Diego Andres Vinasco Trujillo

Full-stack developer

I'm a developer with 3+ years of experience building high-value technological solutions, developing scalable applications with tools like React and Angular in differents projects using AI tools to optimize the development process.

Not only passionated on my field, but also very proficient at it thanks to my knowledge in agile methodologies like Scrum and Kanban, and having a strong focus on team work.

Some of the tools I like and use the most are: React, Angular, GatsbyJS, NextJS, Sass, Git, Python, AWS, Firebase, Mongo and SQL.

Experience

February 2025 - February 2026

React Developer

Alternova Inc.

Development and implementation of scalable, high-value frontend solutions for software products, using React related frameworks and Backend as a Service such as Firebase. Integration of APIs, participation in project refactoring, improving software quality, maintainability, and code scalability. Active contribution to technical analysis, implementation definition, and decision-making.

September 2024 - February 2025

Software Developer

Online SAT

Development and scaling of HIPAA-compliant medical administrative software, implementing new features and modular components with Next.js. Contributed to backend support using Django to ensure stability and performance. Focused on delivering secure and maintainable solutions for regulated environments.

August 2023 - January 2024

Development Engineer

IT Agil S.A.

Collaborated on different projects using .NET and Angular, building services and integrating them with frontend components. Developed proofs of concept for new tool implementations to validate technical reliability. Focused on API integration and delivery of high-value fullstack solutions.

July 2022 - August 2023

Frontend Developer

Pragma

Participated in multiple projects, mostly focused on the E-commerce area, using Next.js, Gatsby, and Angular. Provided support to microfrontend-based portals, resolving Salesforce tickets and implementing key features for marketing campaigns.

Education

Jan, 2017 - Sep, 2022

Systems engineering and Computer Science

Pontificia Universidad Javeriana Cali

Skills

React | Angular | NextJS | GatsbyJS | Express.js | Python | DJango | AI Tools | Claude Code | Gemini | GPT Codex | DeepSeek | Firebase | Javascript | Typescript | CSS | SASS | SQL | MongoDB | SEO | Microfrontends | AWS | Git | Scrum | English B2
